

MONROE COUNTY

Countywide Active Transportation Plan

Monroe County and the Genesee Transportation Council are developing a Countywide Active Transportation Plan (CATP) for Monroe County. The CATP will provide the County with an **equity-focused, data-driven framework for achieving desired changes to the County's non-motorized transportation network**. This may include recommendations for new or revised policies, tools for decision-makers, and/or transportation infrastructure investments.

The Monroe County CATP will build upon recent and ongoing transportation planning initiatives, including, but not limited to, the City of Rochester Comprehensive Access Mobility Plan (2020), Monroe County's "Carrie Ray's 3-Foot Passing Law" (2021), Reconnect Rochester's "Transportation and Poverty in Monroe County" (2018), multiple town/village-scaled Active Transportation Plans, and the concurrent development of the Rochester Active Transportation Master Plan. The Plan will aim to strike a balance between several community planning priorities, including racial equity/social justice, sustainability, and accessibility. A central goal of the Monroe County CATP is to identify equitable active transportation solutions and provide a roadmap for the County to improve walking and bicycling infrastructure.

"Active transportation"

is a means of travel that is powered by human energy - primarily walking and bicycling - or facilitated by public transportation systems. The term "active transportation" expresses the key connection between healthy, active living and our transportation choices.

ADAM J. BELLO
COUNTY EXECUTIVE

GTC

Countywide Active Transportation Plan

The Monroe County CATP is expected to be completed by Spring 2023. A Project Advisory Committee consisting of local advocacy groups, community officials, stakeholders, and transportation professionals has been convened to guide and inform the development of the CATP across all phases. Visit the project website for more information on completed and upcoming project tasks and milestones.
